Dutch B HL Paper 1

Now in its 4th edition, this text offers a comprehensive review of the legal aspects of nursing in Great Britain. It covers criminal & civil law, regulation of the NHS & also issues regarding patient rights, such as data protection, treatment consent & confidentiality.

In this book Ulbe Bosma explores the experience of immigrants in the Netherlands over sixty years and three generations. Looking at migrants from all countries, Bosma teases out how their ethnic identities are informed by Dutch culture, and how these immigrant identities evolve over time. “Fascinating, comprehensive, and historically grounded, this essential volume reveals how the colonial past continues to shape multicultural Dutch society. . . . It is an important counterpart to work on France, Britain, and Portugal.”—Andrea Smith, Lafayette College

European colonial expansion led to Dutch notions of civilised society, or the Dutch's community's flexible and relatively charitable attitudes toward 'others', being scattered (as in the Greek word 'diaspeirein') to the four corners of the earth. In some cases, the exportation of Dutch cultural values to places overseas, like North America, endowed 'Dutchness' with subtle new meanings. But in
colonial Indonesia, Dutch political customs and traditions were transformed in the process of migrating to exotic locales. In this book, Frances Gouda examines the ways in which the Netherlands portrayed its unique colonial style to the outside world. Why were citizens of a small and politically insignificant European nation able to represent as natural and normal their dominance over ancient civilizations on islands such as Java and Bali? How did Dutch colonial residents explain the cultural differences between themselves and the supposedly 'primitive' peoples of the Indonesian archipelago? In trying to understand the 'gendering' practices of colonial governance in the Netherlands East Indies, Gouda also explores the interactions of Dutch and Indonesian women with European men. FRANCES GOUDA earned a Ph.D. in history from the University of Washington in Seattle in 1980. She is currently professor of history and gender studies in the Political Science Department of the University of Amsterdam.

This book reconciles the existence of technical trading with the Efficient Market Hypothesis. By analyzing a well-known agent-based model, the Santa Fe Institute Artificial Stock Market (SFI-ASM), it finds that when selective forces are weak, financial evolution cannot guarantee that only the fittest trading rules will survive. Its main contribution lies in the application of standard results from population genetics which have widely been neglected in the agent-based
community.

The Future of Assisted Suicide and Euthanasia provides the most thorough overview of the ethical and legal issues raised by assisted suicide and euthanasia—as well as the most comprehensive argument against their legalization—ever published. In clear terms accessible to the general reader, Neil Gorsuch thoroughly assesses the strengths and weaknesses of leading contemporary ethical arguments for assisted suicide and euthanasia. He explores evidence and case histories from the Netherlands and Oregon, where the practices have been legalized. He analyzes libertarian and autonomy-based arguments for legalization as well as the impact of key U.S. Supreme Court decisions on the debate. And he examines the history and evolution of laws and attitudes regarding assisted suicide and euthanasia in American society. After assessing the strengths and weaknesses of arguments for assisted suicide and euthanasia, Gorsuch builds a nuanced, novel, and powerful moral and legal argument against legalization, one based on a principle that, surprisingly, has largely been overlooked in the debate—the idea that human life is intrinsically valuable and that intentional killing is always wrong. At the same time, the argument Gorsuch develops leaves wide latitude for individual patient autonomy and the refusal of unwanted medical treatment and life-sustaining care,
permitting intervention only in cases where an intention to kill is present. Those on both sides of the assisted suicide question will find Gorsuch's analysis to be a thoughtful and stimulating contribution to the debate about one of the most controversial public policy issues of our day.

The Company-State offers a political and intellectual history of the English East India Company in the century before its acquisition of territorial power. It argues the Company was no mere merchant, but a form of early modern, colonial state and sovereign that laid the foundations for the British Empire in India.

Catalogue of all the portraits in Pepys's library including Pepys's `Collection of Heads'.

This book contains the refereed proceedings of the 19th International Conference on Business Information Systems, BIS 2016, held in Leipzig, Germany, in July 2016. The BIS conference series follows trends in academia and business research; thus the theme of the BIS 2016 conference was Smart Business Ecosystems". This recognizes that no business is an island and competition is increasingly taking place between business networks and no longer between individual companies. A variety of aspects is relevant for designing and
understanding smart business ecosystems. They reach from new business models, value chains and processes to all aspects of analytical, social and enterprise applications and platforms as well as cyber-physical infrastructures. The 33 full and 1 short papers were carefully reviewed and selected from 87 submissions. They are grouped into sections on ecosystems; big and smart data; smart infrastructures; process management; business and enterprise modeling; service science; social media; and applications.

Monthly. Papers presented at recent meeting held all over the world by scientific, technical, engineering and medical groups. Sources are meeting programs and abstract publications, as well as questionnaires. Arranged under 17 subject sections, 7 of direct interest to the life scientist. Full programs of meetings listed under sections. Entry gives citation number, paper title, name, mailing address, and any ordering number assigned. Quarterly and annual indexes to subjects, authors, and programs (not available in monthly issues).

The six volumes that make up this unique set provide an extensive overview of colonialism in South-East Asia. In the majority of cases, authors chosen were specialists writing about their individual areas of expertise, and had first-hand experience in the region. Outline of contents: * I. Imperialism before 1800 [Edited by Peter Borschberg] * II. Empire-Building in the Nineteenth-Century * III. High Imperialism * IV. Imperial Decline: Nationalism and the Japanese Challenge * V. Peaceful Transitions to Independence * VI. Independence through Violent Struggle

Developed from the author's training programme that is used in many countries around the world, this manual is designed for professionals working with the terminally ill. The book covers...
the physical, psychological and spiritual aspects of care. These two volumes, entitled "Purine Metabolism in Man IV" contain the papers presented at the Fourth International Symposium on Human Purine and Pyrimidine Metabolism", held in Maastricht (The Netherlands), June 1982. The proceedings of the three previous meetings in Tel Aviv (Israel, 1973), Baden (Austria, 1976) and Madrid (Spain, 1979) were also published by Plenum Press. In the past few years interest in purine and pyrimidine metabolism under normal and pathological conditions has been growing rapidly. Apart from the more or less classical topics such as hyperuricaemia, clinical gout and urolithiasis, an increasing number of papers relating to other fields have been presented at successive meetings. Knowledge derived from the study of purine metabolism in relation to lymphocyte function, for instance, has opened up new possibilities for immunomodulation and leukaemia chemotherapy, with eventual consequences for other types of cancer. At previous meetings there have been pointers implicating purine metabolism in relation to normal cardiac and skeletal muscle function. During the present meeting much new data on both issues have been reported which indicate clear differences in the pathways of ATP metabolism. The widening of the field of interest is also illustrated by the recent work on infectious disease: exploitation of the differences in purine metabolic pathways in certain parasites compared with those in human cells has resulted in new rationales for therapy being developed.

As The European Union Opens Negotiations On Membership With Five Of The Ten post-communist states who have applied, this book looks at some of the challenges presented by Eastern enlargement - not only to existing member states and European institutions, but also to the Central and Eastern European countries themselves.; The approach is interdisciplinary,
and brings together contributions from academic specialists on security and international relations; European institutions; the economics of European integration; and the domestic politics of Central and Eastern Europe.; The book has been structured to provide a clear and comprehensive introduction to the topic for students taking a range of courses, including European integration, the politics of post-communist democracies, and Europe's post-Cold war order.; At the same time it will be accessible to more general readers with an interest in European Union affairs, while presenting research to specialists in the area.
