Inspiration for The Deck of Life emerged from the author's clinical observations of patients in his practice of dermatology and internal medicine. He became increasingly aware of the connection between the genetic code as it relates to body build, temperament, and disease predisposition. It was further observed that these factors were influenced by the patient's "belief system" as it relates to personal characteristics, behavior, and reactions to life's situations. This book explores this unique relationship and our inherent ability to alter these features. It confirms the truth that there is a choice and an unlimited capacity to live a stress free life, with peace, happiness, and longevity. The reader is guided to discover their dominant and sub-dominant temperament. A better understanding of ourselves enables us to "play a winning hand" with the cards we are dealt in life. Consequently, we make decisions more wisely in the areas of health, career choice, choosing a mate, child rearing, and the day-to-day communications and enjoyment of the people in our lives.

While previous studies have contrasted the relative optimism of middle-class social scientists before 1848 with a later period of concern for national decline and racial degeneration, Staum demonstrates that the earlier learned societies were also fearful of turmoil at home and interested in adventure abroad. Both geographers and ethnologists created concepts of fundamental "racial" inequality that prefigured the imperialist "associationist" discourse of the Third Republic, believing that European tutelage would guide "civilizable" peoples, and providing an open invitation to dominate and exploit the "uncivilizable."

The world is not in need of those who will fix errors of humanity but in dire need of matured Christians who would use their gifts to communicate the word of God and lead their families, the Church, communities and their countries in the way of righteousness. Very few of them, however, seem to have what it takes to take their positions as leaders and ministers in their spheres despite their God-given potentials. Thus this Course Book - a compilation of five resource materials on Christian Oral Communications, Christian Drama Communications, Christian Musical Communications, Christian Human Resources and Children Evangelism - makes serious attempts to introduce everybody into various creative ministries that are required in the Body of Christ and in the world. It teaches in a simple manner the management of human resources and the ways Christians can use their gifts to reach out to souls through speaking, writing, drama, media, musical and children ministries. The resource materials equip and help individuals to identify their callings, providing Biblical principles and guidelines on how to be effective and productive in the service of the Lord in spite of the hostile environments. Throughout history, how society treated its disabled and infirm can tell us a great deal about the period. Challenged with any impairment, disease or frailty was often a matter of life and death before the advent of modern medicine, so how did a society support the disabled amongst them? For centuries, disabled people and their history have been overlooked - hidden in plain sight. Very little on the infirm and mentally ill was written down during the renaissance period. The Tudor period is no exception and presents a complex, unparalleled story. The sixteenth century was far from exemplary in the treatment of its infirm, but a multifaceted and ambiguous story emerges, where society's 'natural fools' were elevated as much as they were belittled. Meet characters like William Somer, Henry VIII's fool at court, whom the king depended upon, and learn of how the dissolution of the monasteries contributed to forming an army of 'sturdy beggars' who roamed Tudor England without charitable support. From the nobility to the lowest of society, Phillipa Vincent-Connolly casts a light on the lives of disabled people in Tudor England and guides us through the social, religious, cultural, and ruling classes' response to disability as it was
then perceived.

"The principal object of the author in writing this book, was to render this noble and delightful science accessible to all classes of readers. A second object of the author was to give the science of man a direct bearing upon other sciences, and especially upon religion and theology. Psychology and theology are connected by their common subject, which is man. The present work is, as far as the author knows, the first attempt to unite German and American mental philosophy. This design has not been executed by bringing together two separate systems or by forming an eclectic compound, which is neither the one nor the other, and the parts of which do not grow forth from one spirit, but are brought together from different sources and united by the writer—a real sphinx in the sphere of science"—Preface. "The two streams in the human being combine to produce what is commonly known as a person's temperament. Our inner self and our inherited traits co-mingle in it. Temperament is an intermediary between what connects us to an ancestral line and what we bring with us... Temperament strikes a balance between the eternal and the ephemeral..." From personal spiritual insight, Rudolf Steiner renews and broadens the ancient teaching of the four temperaments. He explains how each person's combination of temperaments - with one usually uppermost - is shaped. Steiner gives lively descriptions of the passive, comfort-seeking phlegmatic, the fickle, flitting sanguine, the paced, gloomy melancholic and the fiery, assertive choleric. He also offers practical suggestions aimed at teachers and parents for addressing the various manifestations of the temperaments in children, as well as advice intended for adults' personal development.
